

Q1. What are the problems?

The situation that many people is forced to live urban area, particularly Tokyo.

If we keep the structure of living in Tokyo and buying almost things from rural area by money, there is no essential solution.

It is essentially free that anyone live anywhere.

However, we are often forced to live in Tokyo by various reasons.

A look, we believe that we decide to live in Tokyo by ourselves.

But, several people think that if it is possible, they do not want to live in Tokyo.

In fact, several people have transferred from outside of Tokyo.

Q2. What are the hopes?

I think that it is a good thing that various people is mixed.

(MIMI-CEN7's member said "many outsiders come here".

I do not know whether it connects good future directly.

But, if various people think various ideas and talk about them, variation of possibility can be expanded.

Therefore, our survival possibility may be increased relatively.

Q3. What are the lessons for you?

As we are often said, I think that it is impossible to change other people and past.

That is to say, we can change just only own future.

Therefore, I think that the following actions are needed.

- To consider the worst situations.
- To consider the future.
- To consider whether it is against instinct of organism or not.
- To decide for or against.
- To participate anything as much as possible.

Q4. What can you (or do you want to) do?

I think that I would like to go to Tohoku as often as possible.

Also, I would like to go to outside of Tohoku.

I would like to go to everywhere and I would like to talk with everyone.

I think that it is the first step for me to hear their talk.
