Integrated Academic Administration-Learning Management System, SIRIUS

SIRIUS is a TUAT's university-wide integrated academic administration-learning management system that centrally manages and provides a variety of information enabling comprehensive support for the students' learning environment, with the aim of improving the university's educational services. With this system, you can register for courses, check timetables, and view your academic performance and various information and announcements through the bulletin board online. You can also obtain lecture materials, submit assignments, and communicate with instructors.

This system is also essential for your student life, so please access and use it on a daily basis.

Key functions	Course registration, syllabus query, academic performance query, enrolment status query, canceled/substituted class information query, various applications, bulletin board viewing, course survey submission, and more
